RETAIL
PRICE LIST

Texas
Nursery Co.

Sherman, Texas

OUR SERVICE—We endeavor to grow stock that is clean, free from disease, and true to variety, but should any tree or plant purchased from us prove not true to name, it is understood and agreed that we will either replace said stock or refund the purchase price, but that we shall not be held liable for any greater amount or for damages.

ERRORS AND COMPLAINTS—We shall use our best efforts to give complete satisfaction, and should an error occur in filling an order we will gladly correct same if it is called to our attention promptly. If you are not entirely satisfied with stock received from us, tell us at once.

PRICES—All prices are for stock delivered f. o. b. Sherman, Texas, and are subject to stock being unsold on receipt of order. Unless indicated as B&B (balled and burlaped) trees and plants quoted will be supplied not balled and burlapped. If trees and plants quoted as B&B are wanted not balled and burlapped, deduct 40% from B&B prices. If trees and plants quoted as not balled and burlapped are wanted B&B, multiply the not balled price by $2\frac{1}{2}$.

GUARANTEE—We do not guarantee stock to grow. However, any stock which we supply and which fails to grow the first year will be replaced at one-half current prices.

NUMBER OF TREES PER ACRE

The number of trees to be planted per acre varies somewhat with the soil and the variety to be planted. Trees or plants on deep rich soil require more distance than on light poor soil. The following distances are usually recommended for average soils:

Apple—30x25 feet—58 Trees per Acre.

Apricot—18x18 feet—134 Trees per Acre.

Cherry—Same as Apricot.

Figs—15x15 feet—193 Trees per Acre.

Peach—20x20 feet—108 Trees per Acre.

Pear—Same as Paech.

Plum—Same as Apricot.

Pecan—40x40 feet—27 Trees per Acre.

Grape—8x10 feet—545 Vines per Acre.

Blackberry and Dewberry—3x8 feet—1,815 Vines per Acre.

To ascertain number of plants required per acre, divide the number of square feet in an acre (43,560), by the number of square feet to be given each plant. For instance, apple 30x25 feet requires 750 square feet per tree or 58 trees per acre.
